LUCAS THOMAS

(416) 997-0736 | Lucasdt416@gmail.com
Toronto, ON | www.linkedin.com/in/lucas-thomas12

Education

University of Toronto | Toronto, ON
Bachelor of Applied Science (B.A.Sc.), TrackOne Engineering
Pursuing Computer Engineering
Expected Graduation: May 2031

Northern Secondary School | Toronto, ON
Ontario Secondary School Diploma | Graduated June 2026
- Graduated with Honours (96% average)
- AP Coursework: Advanced Functions, English

Awards

Chem 13 News Exam (University of Waterloo)
- Ranked 8th in Canada and 27th Worldwide (2026)

SHAD Canada 2024
- Best Video Presentation Award

CETA Robotics Competition
- 3rd Place Overall
- 1st Creativity Award
- 2nd Obstacle Avoidance Award

Ontario Scholar
Northern Design Technology Award

Projects

StockPulse (Stock News Dashboard in Development)
Independent Web Development | Python, JavaScript, GitHub Actions, Chart.js | 2026 – Present
- Built a full-stack news aggregation pipeline pulling from SEC filings, company IR feeds, and Finnhub, with a deduplication engine and a rule-based classifier scoring 30+ companies across sectors by news impact.
- Designed and shipped a CI/CD pipeline with 56 automated tests gating every deploy, plus a self-healing monitoring system that detects and recovers from failed daily data runs.
- Collaborated with a graduate student co-developer to iterate through 6+ major feature phases, live at stock-news-dashboard.pages.dev.

SEEK Jr. Hackathon
Hackathon Project | Arduino, Motion Sensors, C++ | November – December 2025
- Collaborated in a team to design and develop a fully autonomous robot that could withstand simulated extraterrestrial conditions.
- Applied engineering design and problem-solving principles to address the challenge, troubleshooting problems within a 1-day timeframe.
- Presented the final solution to judges, incorporating feedback throughout development, winning the Best Science Award.

Echo
Independent Game Development | Unreal Engine, C++ | August 2025
- Developed a 3D extraction game using Unreal Engine, implementing gameplay mechanics and interactive systems.
- Designed and tested game features and world building through iterative development and debugging.
- Strengthened programming and software development skills while managing the project.

Smart Windows – SHAD Canada
Engineering Design Project | July – August 2024
- Collaborated with a multidisciplinary team to design an energy-efficient smart window concept focused on reducing building energy consumption.
- Conducted research, evaluated design alternatives, and contributed to technical presentations and project documentation.
- Awarded Best Video Presentation for effectively communicating the team's engineering solution.

CETA Robotics Competition
Mechanical Design & Robotics using Raspberry Pi | January 2025 – May 2025
- Designed and refined robot mechanisms as part of a competitive robotics team to undergo many challenges, such as speed and obstacle avoidance.
- Collaborated with teammates to prototype, test, and improve system performance under competition constraints.
- Earned 3rd Place Overall and the Creativity Award for innovative robot design.

Leadership & Experience

Powertrain Team Member
University of Toronto Supermileage Team (UTSM) | 2026 – Present
- Redesigning the brake pedal for the team's ultra-energy-efficient competition vehicle.
- Researching field-oriented control (FOC) firmware for the vehicle's electric motor drive.
- Contributing to a student team that designs, builds, and races vehicles in the Shell Eco-marathon Americas.

Head of Finance
United Way Student Leadership Committee | 2024 – 2025
- Managed budgeting and financial planning for student-led fundraising and community initiatives.
- Coordinated with committee members to allocate resources and support event planning raising over $3,000.
- Maintained financial records and contributed to strategic decision-making for committee activities.

Student Senator
Northern Secondary School Student Council | 2024 – 2025
- Collaborated with student leaders and staff to organize events and improve student engagement.
- Represented the student body by communicating student feedback and participating in school-wide initiatives.
- Contributed to planning activities that promoted school involvement and community.

Robotics Team Member
Northern Secondary School Robotics Team | 2025 – 2026
- Collaborated with teammates to design, prototype, and test competitive robotics systems for Team 8884.
- Contributed to CAD modeling and mechanical design using Onshape to make specialized parts for the robot.
- Applied the engineering design process to improve robot performance through iterative testing.
